

Window & Door Checklist

Keeping a window and door checklist is a simple yet effective way to maintain the quality and comfort of your home.

- ☐ Check your windows for seal failure - if you have condensation in your glass that is a sign of seal failure.
 - ☐ Inspect gutters and downspouts for damage and debris - excessive water out of gutters can cause your windows to fail.
 - ☐ Inspect weatherstripping around exterior doors and windows for wear, tear or damage.
 - ☐ Inspect window frames for cracks, warping, or damage, particularly in wooden frames.
 - ☐ Inspect caulking around windows and doors for damage or wear.
 - ☐ Test locks and knobs to ensure they function properly and check for loose screws.
-
